## Griffith Festival of Gardens

A centenary is a significant celebration and the 2016 Festival of Gardens contributes to the celebrations of Griffith's centenary with a program which will cater to visitors and locals alike. The festival begins with the construction of the Real Juice Company Citrus Sculptures on Sunday 9th October. An invitation is extended to all to come along and assist in erecting the 70 citrus sculptures which brighten Banna Avenue for the 2 weeks of the festival.

Costa Georgiadis, ABC Gardening presenter and entertainer, begins his program with a free workshop for families at Griffith City Park on Thursday 13th October. His busy program continues with walks and talks in the open gardens, attendance at the Paella by the Sculptures and presentation at the Long Table Dinner at Pioneer Park Museum.

The Festival program includes the Paella by the Sculptures on Friday 14th October in the Visitor Information Centre car park with delicious paella and entertainment by community groups making this a popular attraction for families.

Eight private gardens will be open to the public from Friday 14th to Monday 17th October. These gardens are guaranteed to provide visitors with different visual and sensory experiences and garden owners are on-hand and willing to share their gardening tips and information with visitors.

On Saturday 15th the Long Italian Table Dinner at Pioneer Park Museum provides a unique cultural experience as diners relax under the stars, share a long table, Italian food and local wine and are entertained by Costa and a local Italian piano accordionist.

2016 is a special year for the Griffith community and the 2016 Festival of Gardens will be one of the outstanding centenary festivals.

Come and join the party!

## The Greek returns to Griffith

It's an absolute pleasure to be coming back to Griffith and to be part of your Festival of Gardens & Citrus Sculptures for 2016. Being a part of the event in 2015 was an experience that I have been speaking about everywhere I go around the country. The Griffith Community made me feel so welcome during my stay and people approaching me to say hi and welcome and thanks for coming from the moment I touched down and met the staff at the airport. From the Paella night to the retirement village, the long table dinner under the stars, to the school visits, the incredible gardens and the full tilt passionate gardeners it was a no contest when Mirella and the Visitor Centre team asked me before I left if I would come back again this year. And I am really looking forward to returning to Griffith and meeting familiar faces again, making new friends and seeing the gardens, the landscapes and the sculptures in a whole new light. Regional events

like this put places on the map and to all the individuals behind the scenes, the volunteers who do this because they love it and they love their home, their part of the world I respect and acknowledge all you do. See you out in the gardens or on the streets or at one of the many planned events.

## Citrus Sculptures 9-22 October 2016

The Citrus Sculptures are a unique event in Australia and a feature of the Griffith Festival of Gardens. Now in their 21st year, the sculptures have grown from just five in 1995 to more than 70 large 3D sculptures lining Banna Avenue, Griffith's main street in 2016. The sculptures are based on the famous lemon sculptures in Menton, France and with Griffith being a major citrus producing region in Australia the sculpture idea was a good one. After consulting local engineers and contacting France, Griffith was granted permission to use their method of securing the fruit. The Citrus Sculptures have become a major visitor attraction bringing thousands of people to Griffith every year. Since 2013, Real Juice Company has been the naming rights sponsor of the Citrus Sculptures, offering both a wonderful synergy and the opportunity to continue to grow the Festival. Real Juice Company is a local juicing business. The sculptures are erected early on Sunday morning by an army of over 700 community volunteers. More than 100,000 oranges and rubber bands are used to construct the sculptures. It is a fabulous community event with schools, local businesses, banks, cultural, service and church groups, and multi-national companies working side by side to create a magnificent outdoor exhibition.

***As this is a free exhibition, any donations will be greatly appreciated and can be made at the Visitor Information Centre***

### Interesting Fact

The Riverina produces 1/3 of Australia's citrus and is the major orange production region in Australia. Our unique combination of water security, fertile soils, advanced farming practices and warm climate produce some of the highest quality citrus fruit on the global market.

48 years ago our bare, dusty block, with a public park on its western side, began its transformation. Lawn was laid and the beginning of formal plantings, including an extensive rose garden, celebrated the love of colour, flowers, floral scents and beauty – a gift passed on by my mother! Adjusting, over time, to present conditions of added shade, design preferences, space available and optimum growing conditions, the front garden displays individual perennial shrubs, varying in scale and textures, but with complementary splashes of colour, highlighting the fresh greens and powdery greys of understorey plantings. The back garden features formal hedges, enclosing perennial shrubs chosen for shape, style, and colour.

It has been recently planted amongst established trees, forming paths and arches that exhibit many roses and cottage plants. A section of the rose garden holds many classics. Items of Australiana are scattered throughout the garden, with Sunshine gates, a Furphy water tank and a rose arbour being amongst the features. A small exhibition of local artwork will also be on display and thus infuses the garden with a "heritage feel".

Small garden rooms have been incorporated to provide cool shaded areas for tropical and shade loving plants. A 40 year old Liquid Amber is wonderful here.
